Supplemental disclosure with respect to cash flows (note 11)

Madison Minerals Inc.
Notes to Interim Consolidated Financial Statements
for the six months ended April 30, 2010
(unaudited)

1. NATURE AND CONTINUANCE OF OPERATIONS

The Company is incorporated in the Province of British Columbia and is in the process of exploring its resource properties. It has not yet determined whether these properties contain ore reserves that are economically recoverable. To date, the Company has not earned significant revenues and is considered to be in the exploration stage.

At April 30, 2010, the Company had working capital of \$384,127 (October 31, 2009 – \$565,237) which management believes will be sufficient to meet the Company's general and administrative expenses and expenditure commitments on its resource properties for the coming year. If the Company is to advance or develop its mineral properties further, it may become necessary to obtain additional funding. While the Company has been successful in obtaining funding in the past, there can be no assurance that it will be able to do so in the future.

These interim unaudited consolidated financial statements have been prepared on a going concern basis, which assumes the Company will be able to realize assets and discharge liabilities in the normal course of business for the foreseeable future.

The business of exploring resource properties involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable operations. The recoverability of amounts shown for resource properties is dependent upon the discovery of economically recoverable ore reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain necessary financing to complete exploration and subsequent development, and upon future profitable production from the properties or proceeds from disposition.

Although the Company has taken steps to verify the title to mineral properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, transfers or other claims, and title may be affected by undetected defects.

2. INTERIM UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

While these interim unaudited consolidated financial statements do not conform in all respects to the requirements of generally accepted accounting principles for annual financial statements they follow the same accounting policies and methods of their application as the most recent annual financial statements and should be read in conjunction with the consolidated financial statements for the year ended October 31, 2009.

3. SIGNIFICANT ACCOUNTING POLICIES

These interim unaudited consolidated financial statements follow the same accounting policies and methods of their application as the most recent annual financial statements of the Company.

4. MARKETABLE SECURITIES

The Company's holdings of marketable securities consist of shares in Lund Gold Ltd. ("Lund"), a public company whose shares are listed on the TSX Venture Exchange (the "Exchange"). Lund is a related party, in that it has a number of directors and senior officers in common with the Company.

Number of shares	Fair value per share end of period	Fair value end of period	Fair value per share beginning of period	Fair value beginning of period
289,000	\$0.07	\$ 20,230	\$0.08	\$ 23,120

Because these shares are listed on the Exchange, published quotations in an active market are available. The company determines the fair value of its holdings of Lund based on the closing bid price on the balance sheet date. In accordance with our accounting policies as set out in our annual audited financial statements, the Lund shares are classified as an "available for sale" financial instrument, and increases or decreases in the fair value are credited or charged to "other comprehensive income (loss)" in the statement of operations. During the period, the Company recognized a comprehensive loss of \$0.01 per share for a total loss of \$2,890.

The Company also holds 3,521,648 shares of Buffalo Gold Ltd., which formerly traded on the Exchange. Trading in the shares of Buffalo Gold Ltd. ("Buffalo") has been suspended on the Exchange, and effective April 30, 2009 the Company wrote down the carrying value of the shares of Buffalo to zero.

9. RELATED PARTY TRANSACTIONS

- a) The Company incurred the following expenses with directors and a company related by way of directors in common during the six months ended April 30, 2010 and 2009:

	2010	2009
	\$	\$
Legal fees	nil	1,000
Wages and benefits	34,320	51,500

Legal fees and wages and benefits have been expensed to operations, capitalized to resource properties or recorded as share issue costs, based on the nature of the expenditure.

- b) As at April 30, 2010, accounts payable and accrued liabilities include \$37,070 (October 31, 2009 - \$2,965) due to officers of the Company and companies related by way of common directors.

10. FINANCIAL INSTRUMENTS AND RISKS

The Company's financial instruments consist of cash, marketable securities, receivables, accounts payable and accrued liabilities, and amounts due from or to the joint venture partner. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant credit or interest rate risks arising from these financial instruments. The fair values of these financial instruments approximate their carrying values, unless otherwise noted.

Financial risk factors

The Company's risk exposures and the impact on its financial instruments are summarized as follows.

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company believes it has no significant credit risk.

Liquidity risk

The Company manages liquidity risk by ensuring that it maintains sufficient liquidity to meet liabilities as they become due. As at April 30, 2010 the Company had cash balances totaling \$366,133 (October 31, 2009 - \$536,194) to settle current liabilities of \$75,890 (October 31, 2009 - \$111,895).

10. FINANCIAL INSTRUMENTS (cont'd...)

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

(a) Interest rate risk

The Company holds cash balances and has no interest-bearing debt. The Company's cash balances are held in demand deposits with a major Canadian chartered bank. The Company periodically monitors and is satisfied with the credit rating of its bank.

(b) Foreign exchange rate risk

The Company's mineral property costs are incurred predominantly in U.S. dollars and the line items in its statement of operations are incurred predominantly in Canadian dollars, and any future equity raised is expected to be in Canadian dollars. As at April 30, 2010 the Company had balances denominated in U.S. dollars of cash US\$67,996 and a receivable of US\$7,944. For each 1% change in the U.S. dollar versus the Canadian dollar a gain or loss of US\$751 would arise. Consequently, the Company believes it is not exposed to significant currency risk at this time. The Company has to date elected not to seek protection from adverse changes in foreign exchange rates by such means as hedges, options or futures contracts.

(c) Price risk

The Company is exposed to price risk with respect to equity prices, and in particular to movements in the market price of shares of Lund. Each \$0.01 increase or decrease in the fair value of Lund has the effect of adding or subtracting \$2,890 to or from the Company's comprehensive income.

11. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

Significant non-cash transactions for the period ended April 30, 2010 consisted of the Company incurring mineral property expenditures of \$780 (2009 – \$17,377) through accounts payable.
